

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of claims:

Claim 1 (original): Vitamin-containing system for stabilising the external and the internal immune response of animals, said system consisting of two parts or "kits" to be used successively or separately, characterised in that:

- kit 1 includes 0.5 to 30% of biotin,
0.01 to 5% of allicin and
0 to 10% of crushed radishes (*raphanus savitus*) mixed in a carrier
including oat as stabilizer, and
- kit 2 includes 5 to 30% of vitamin E,
0.1 to 15% of stabilised vitamin C,
0.1 to 1% of selenium,
0.1 to 10% of allicin and
0 to 10% of crushed radishes (*raphanus savitus*) also mixed in a carrier.

Claim 2 (Original): Vitamin-containing system as claimed in claim 1, characterised in that the carrier includes ground oat, barley and bran.

Claim 3 (Original): Vitamin-containing system as claimed in claim 1, characterised in that the carrier includes demineralized water.

Claim 4 (currently amended): Vitamin-containing system as claimed in ~~any of the claims 1 to 3~~ claim 1, characterised in that it is administered by using the following dosage:

The first 7 days: Double dosage compared to the prescribed standard dosage of the ingredient in question.

The following 14 days: Ordinary dosage, i.e. a dosage corresponding to the ordinarily prescribed dosage of the ingredient in question

which results in a total treatment period of 21 days.

Claim 5 (Currently Amended): Vitamin-containing system as claimed in ~~any of the claims 1 to 3~~ claim 1, characterised in that the following guidelines are used with respect to the choice of system:

External immune response (hoof, heel, skin, coat etc.): kit 1

Internal immune response (parasitic and bacterial attacks etc.): kit 2

whereby the two kits can be used successively.

Claim 6 (New): Vitamin-containing system as claimed in claim 2, characterised in that it is administered by using the following dosage:

The first 7 days: Double dosage compared to the prescribed standard dosage of the ingredient in question.

The following 14 days: Ordinary dosage, i.e. a dosage corresponding to the ordinarily prescribed dosage of the ingredient in question

which results in a total treatment period of 21 days.

Claim 7 (New): Vitamin-containing system as claimed in claim 3, characterised in that it is administered by using the following dosage:

The first 7 days: Double dosage compared to the prescribed standard dosage of the ingredient in question.

The following 14 days: Ordinary dosage, i.e. a dosage corresponding to the ordinarily prescribed dosage of the ingredient in question

which results in a total treatment period of 21 days.

Claim 8 (New): Vitamin-containing system as claimed in claim 2, characterised in that the following guidelines are used with respect to the choice of system:

External immune response (hoof, heel, skin, coat etc.):	kit 1
Internal immune response (parasitic and bacterial attacks etc.):	kit 2

whereby the two kits can be used successively.

Claim 9 (New): Vitamin-containing system as claimed in claim 3, characterised in that the following guidelines are used with respect to the choice of system:

External immune response (hoof, heel, skin, coat etc.):	kit 1
Internal immune response (parasitic and bacterial attacks etc.):	kit 2

whereby the two kits can be used successively.
